To Whom It May Concern

Re : Letter of Reference

I confirm that I have known and made use of DataScope Support team for the last 4 years.

Once you have lodged you call on the portal, the support staff will keep you informed of the process of you lodged call.

The support staff is friendly and are willing to go the extra mile to have any issue resolved in a timelessly fashion.

One of the advantages in dealing with the support team is that they are all efficient in different areas. They are able and willing to ask their colleagues for assistance so that any issues can be resolved quickly.

When the Support team is on your side they are friendly and really listen to your concerns. The support team also interacts with all staff members using the WMS system.

I would recommend DataScope for any new Warehouse Management System that any company would like to implement.

Should you require any reference you are more than welcome to contact me.

Regards,

Bernita Coetzee
IT/Systems Administrator
