To Datascope Consulting:

INSTALLATION OF WAREHOUSE MANAGEMENT SYSTEM (WMS) AT NEDSCHROEF SA

Dear Javan,

The management and staff of Nedschroef SA would like to extend our thanks for the successful installation of the DATASCOPE WMS system at our factory in Boksburg, Johannesburg. Having successfully completed the software implementation, we have experienced the following benefits:

1. Our total Stock-taking time has reduced dramatically;
2. The scanner-based GRN of purchased stock has reduced data capture time and has freed up the stores control to focus on additional tasks;
3. Scale integrated labour postings on the factory floor have given up-to-date visibility of manufacturing;
4. Our finished goods warehouse stock management has been optimized and sales order picking is now fully barcode scanned. The picking accuracy has improved.

Additionally, we thank you for the effort during the implementation phase and we appreciate the continued support we get from Datascope. We look forward to a long and successful relationship.

Yours faithfully,

NEDSCHROEF SA MANAGEMENT
